## Tutoring Experience

For the past six years, I have guided students through the intricacies of IB Business Management, helping them understand complex topics while preparing them for their assessments. My teaching has spanned various global curricula, and I have developed a reputation for helping students achieve top grades, especially in their IB final exams. My focus on real-world business examples ensures students see the practical side of what they learn.

In addition to teaching IB, I have taught A-Level and IGCSE Business Studies, working closely with students to improve their performance. My approach involves using a wealth of relevant case studies and examples to bring lessons to life, helping students better understand the material. I also support students with their Internal Assessments, ensuring they produce high-quality work.

My experience extends to mentoring students with diverse learning needs, including those who have struggled with business concepts in the past. By adapting my teaching style to fit individual needs, I've seen significant improvement in their results, with many students going on to excel in competitive university applications.
